

1/24/2019

This document is a placeholder for a group of products that have been tested and approved by CCCF. They are approved to ship into China per John Donnelly. We do have test reports from CCCF. However, CCCF will not issue the actual certification documents until the next site audit has been completed by CCCF.

This placeholder has been applied to the BOM for these products as a means of notification that these are approved products and are subject to revision notification the same as other approved products.

When the official product certification documents have been received, individual CERT files will be created and attached to the BOM for these products.
