

Go Configure

Jumbo Low Profile Ball Intake Valves

- 30° Intake Elbow Swivels 360° and has multiple positive detents — make hose connections easy in any direction
- Huge 5.25" waterway provides low friction loss while maximizing flow and is great for drafting too
- Easy to operate even under pressure — configurable left, right, top or front mounted hand cranks

Fits Almost Any Pump Panel / Compartment

TFT offers a BIV solution for every application. Options include handle placement, inlet/outlet sizes, body profile, pressure relief, and remote control. Design your BIV to fit your unique apparatus.

Ten Year Defect and Corrosion Warranty

The valve is hard coat anodized and powder coated to prevent corrosion. More importantly, the internal components are kept dry to eliminate corrosion and leaks.

Upgrade Your Old Leaky Valves

For new or reserve apparatus, replace old leaky valves with a TFT BIV. They have long-lasting, water-tight seals and offer easy field repairs should there ever be an issue.
