Integrating CANbus with TFT RC Monitors

The TFT CANbus adapter (YE-CAN1) circuit board enables TFT products to be used on a fire vehicle's CANbus network. The YE-CAN1 circuit board is installed in a monitor control box or interface box. Below are some highlights of the possible solutions.

Electronics Interface Box (Part# Y5855 for ladders and Y5860 for platforms)

CANbus Enabled	✓
Wireless Accessory Enabled	✓
Wired TFT Accessory Enabled	✓
Local Junction Box	✓
