YE-1F3M RC Monitor & RC VUM Connection Harness

The TFT Monitor and VUM Connection Harness (YE-1F3M) enables a quick, easy connection to TFT RC Monitor and RC VUM when mounted together. See below for comparison of installations. All cables are supplied with necessary Deutsch connectors.

Eliminate mounting & wiring of interface boxes	✓
Eliminate weight of interface boxes	✓
Compact, easy to install	✓
No need to open interface boxes	✓
Fast, easy connections	✓
Higher quality connections	✓

LADDER/PLATFORM CONFIGURATIONS:

Significantly simplify the installations on many ladder/platform applications with the Connection Harness (YE-1F3M) if the design does not require any of the following features:

- Hardwired monitor movement inputs including VERTICAL LIMIT, PARK, DEPLOY, or INHIBIT
- Monitor AT PARK relay
- Hardwired VUM movement inputs
- VUM status relays

ORDERING

Contact Sales for assistance in ordering the appropriate –L or –P monitor with no electronics interface box (Y5855 or Y5860) and the appropriate VUM with no electronics interface box (A5920). If CANbus is required order the TFT CANbus adapter (YE-CAN2) which will install inline with the Connection Harness. The YE-1F3M Connection Harness will provide an easy installation and connection to all of the components.
