

PRODUCT BULLETIN

2.5" Analog Gauge and Hi-Rise Gauge Machining Changes

Changes to the form of the 2.5" Analog Gauge and Hi-Rise Gauge series have been made to promote consistency between analog and Bluetooth models.

These changes are cosmetic only. There is no change to the function of either product series.

The changes affect all 2.5" In-Line Straight and Pivoting Analog Gauges and 2.5" In-Line Straight, Pivoting, and 45 Degree Hi-Rise Gauges in right and left valved configurations.

PREVIOUS DESIGN THROUGH 5/2022

UPDATED DESIGN BEGINNING 6/2022

2.5" Analog Gauge Series*

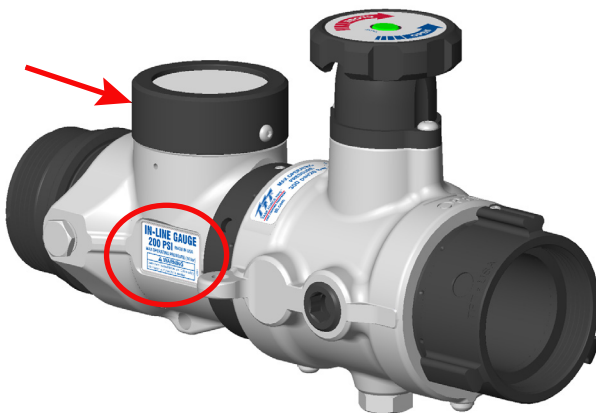

The previous design contains an engraved cap and separate product information label.

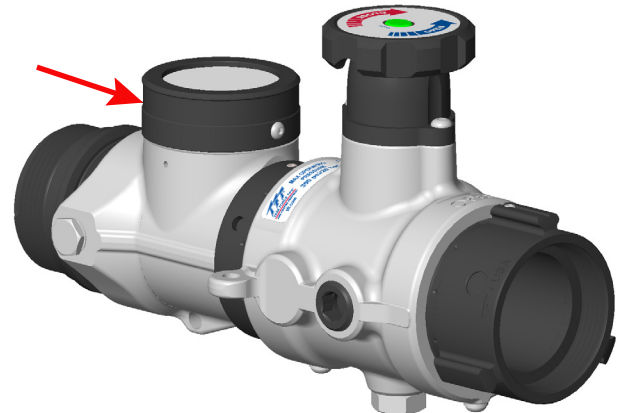

The updated design features a single product information label with serial number, protected by a recessed label pocket.

* Pivoting model shown

2.5" Hi-Rise Gauge Series*

The previous design contains product information label on the valve body casting, a separate In-Line Gauge name label on the outlet casting, and a plain gauge cap.

The updated design features a single product information label on the valve body casting and a machined groove in the gauge cap.

* Pivoting model shown
